## Contents

<b>Chapter 1</b>	9
General introduction and aim of this thesis	
<b>Chapter 2</b>	61
Generic method for the absolute quantification of glutathione S-conjugates: application to the conjugates of acetaminophen, clozapine and diclofenac	
<b>Chapter 3</b>	89
Characterization of cytochrome P450 isoforms involved in sequential two-step bioactivation of diclofenac to reactive p-benzoquinone imines	
<b>Chapter 4</b>	111
Simulation of inter-individual differences in inactivation of reactive para-benzoquinone imine metabolites of diclofenac by glutathione S-transferases in human liver cytosol	
<b>Chapter 5</b>	137
Cytochrome P450 mediated bioactivation of mefenamic acid to quinoneimine intermediates and inactivation by human glutathione S-transferases	
<b>Chapter 6</b>	169
Reduction of chemically reactive drug metabolites by NAD(P)H:quinone oxidoreductase 1 and NRH:quinone oxidoreductase 2 and variability in hepatic concentrations	
<b>Chapter 7</b>	197
Inter-individual variability in activity of the major drug metabolizing enzymes in liver homogenates of 20 individuals	
<b>Chapter 8</b>	225
Variability in hepatic cytochrome P450 mediated formation and glutathione S-transferase catalyzed detoxification of clozapine and diclofenac derived reactive metabolites in liver homogenates of 20 individuals	
<b>Chapter 9</b>	261
Summary, conclusions and future perspective	
<b>Appendices</b>	
1. List of abbreviations	274
2. Nederlandse samenvatting	276
3. List of publications	282
4. Curriculum Vitae	283
5. Acknowledgements	284
